

Additive for anti-settling in organic solvent system

Main component :

Special nitrogen contained compound

Physical & Properties :

Appearance(KSM2051)	Soft paste
Activity	19~21%
Gravity(KSM2131)	0.81~0.91
Flash point(KSM6011)	25℃
Solvent	Xylene

Product features :

- Good thixotropic property in wide range coating system
- Can be dispersed in wide range temperature
- Superior storage stability and no seeding formation
- No influence on inter-adhesive property for system coatings

Application fields :

- Metallic and mica type of general industrial coatings
- High build type of heavy-duty coatings
- Tar epoxy, tar urethane, pure epoxy, chlorinated rubber coatings

Recommended dosage :

3.0~5.0% on total formulation

Adding method :

- CIMA 240-20 should be added to mill base process
- Addition of it can be carried out 40~60℃

Packaging :

15kg can

The others :

Refer to the MSDS for toxicity and safe handling information
